SUBJECT (Descriptive title. Use individual reports for separate subjects)

An unidentified flying object

SUMMARY (Give summary which highlights the salient factors of narrative report. Begin narrative text on AF Form 112a unless report can be fully stated on AF Form 112. List inclosures, including number of copies)

On the 14th day of July 1958 this station received a call from Grand Rapids Michigan GOC reporting that [redacted] - civilian and two other persons had sighted an unidentified flying object. Subject object was sighted on 14 Jul 58 at 0255Z. Description of object as follows:

One round shaped object, the size of a Quarter. Color white. No trail, exhaust or sound. Object was sighted near zenith (within 10 deg.) and disappeared after moving from SW to NE for 60 to 90 seconds, then disappeared behind clouds. Location of observer was Grand Rapids Michigan. Weather conditions were as follows:

Broken ceiling.

Winds at 30,000 ft from 240 deg 20 knots.

40,000 ft from 270 deg 30 knots,

50,000 ft from 280 deg 20 knots, visibility 15 miles.

Sw - to NE
1/2 balloon 100 ft (+) in diameter - would not be seen above 30,000 ft kept under 30,000 ft ceiling - so use winds for this alt. hole

The sighting was reported through GOC, reliability reasonably good.

Not enough from data to work with. kept as mystery.

Confirmed
Additional checks later
Ben released at 2400 (0000 midnight) from Milwaukee 62 miles away and SW of Grand Rapids
This correlates with wind (20400) since wind would be around 30,000 feet and lower.

- INCLS
- ① white round, light - no sound or trail - this is possibly balloon
 - ② moved SW to NE
 - ③ Weather plot (U.S. Weather Bureau) shows winds were blowing from the SW - to - NE at that time - at 30,000 feet and lower.

AFCIN-4E4G
24 July 1958

MEMORANDUM FOR: Captain Miatech - AFCIN-4F3a

SUBJECT: General Orbital-Track Checks for Air Sciences Division.

✓ 1. This office has received a number of UFO reports from GOC posts in the Green Bay, Northern Wisconsin, Michigan and Minnesota areas. A cursory check discloses that these are primarily staffed with high school students now on vacation and elderly people with time on their hands. Their reliability is obvious. However, would appreciate if a check for Satellite be made on the basis of the following observed in that area:

- a. Time: Between 2120 to 2140 hours (local).
- b. Date: 12 July 1958.
- c. General direction: SSW to ENE.
- d. UFO appearance: Very small, white and round.

✓ 2. Just received UFO report from Air Attache, France - there were four military observers. Basic data:

- a. Place: NE France (50 N - 4 E).
- b. Time: 2127 Z (GMT for that area considered 0. Therefore, local time same.)
- c. Date: 11 July 1958.
- d. General direction: ^{180 - 190} 180 - 190 degrees to ⁴⁰⁵⁰ 4050 degrees, estimate, i. e. generally SW to NE.
- e. Appearance: Round, white. In sight approximately one minute.

3. Your comments and results of your computations may be hand written directly on this memorandum. Would appreciate it if you would give us a call.

George T. Gregory
GEORGE T. GREGORY
Captain, USAF

Comment re sighting No. 1:

Date: 12 July 1958
Hours: 2120 - 2140 local
Place: Area near Greenbay, Wisc.)

13/0220 - 0240 July
88 W, 4500 (Covers area to the North
and West also)

a. 0240 Z on 13 July 1958 Δ_I (Sputnik III rocket) was
over Lake Huron at 135 miles altitude.

Using general observation point of 45 degrees N - 90 degrees West
the satellite (1958 Δ_{II}) of Sputnik III followed the rocket portion
by about 8 minutes at this particular time. Its orbit was about 115 miles
to the West of the rocket's orbit but still pretty much in the visibility
range, i.e. (visible at 45 degrees N and 75 degrees - 80 degrees W) upper
half of lower Michigan. Although the direction of motion is consistent
with that of Sputnik III, neither component seems to have been sufficiently
low off the eastern horizon to be seen in the area described.

Comment re sighting No. 2:

Date: 11 July 1958
Time: 2127 Z
Place: NE France (50 N 4 E)

1958 Δ_I (rocket) should have been in the vicinity of the sighting
area (50 degrees N, 4 degrees E) at 2117 Z on 11 July at an altitude of
165 miles traveling in a direction of 25 degrees.

Question? - Source is military man - and with the Air Force - what prompted him to report a ^{new} straight, moving, blinking light that was climbing - and too high to even give a size (by known standard)?

There appears nothing hostile, menacing or unusual about the light - for anything about it that would frighten the source.
